## **DETAILED ACTION**

### ***Claim Objections***

Claim 26 is objected to because of the following informalities: the citation "the size of the structure" does not have antecedent basis. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard claim 24, the citation "adapted to assume" is confusing.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 24-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6684894. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the patented claims appears to be the same as the application claims. Specifically, the patented claim 1 is corresponding to the instant claims 24, 28, 37-39 except for a third loop and a fourth loop members being added to the first and second loops as previously claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have more than two loops such as a third, a fourth loops, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.* 193 USPQ 8. The motivation for doing so would have been to enlarge a structure for more space. And the instant claims 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12 are corresponding to the patented claims 25, 29, 30, 26, 27, 31, 32, 33, 34, 35, and 36, respectively.
